

KEYAAN MINHAS

Computer Science & Cyber Security Undergraduate

Karachi, Pakistan

+60 1128318300

keyaanminhas@gmail.com

github.com/keyaanminhas

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Cyber Security with extensive hands-on experience in full-stack mobile and web development. Proven track record of deploying secure, scalable applications on Play Store and App Store with 500+ active users. Skilled in robotics, automation, and reverse engineering, seeking to leverage technical expertise in challenging software engineering or security roles.

TECHNICAL SKILLS

Languages

C++, JavaScript, Dart, HTML5, CSS3, SQL

Frameworks & Tools

Flutter, Android Studio, Xcode, React, Node.js

Security & Systems

Cyber Security, Reverse Engineering, RESTful APIs

Robotics

Arduino (MultiWii), Robotics Programming, Automation

KEY PROJECTS

Minhas LMS minhasrupsi.computer

Lead Developer

Flutter | Moodle | Android & iOS

- Developed a cross-platform mobile LMS for Computer Science education on top of Moodle.
- Published on Play Store and App Store with significant user engagement.
- Implemented course management, student tracking, and content delivery features.

89th Parallel LMS 89thparallel.me

Lead Developer

Flutter | Moodle | Educational Tech

- Built a fully functional LMS used by an educational institute, integrating backend features for multi-user support.
- Achieved 500+ combined downloads across mobile platforms.

eCube TVET College Website ecube.edu.my

Web Developer

Official Website | Responsive Design

- Developed and maintained the official website for eCube TVET College in Malaysia.
- Implemented responsive design, user-friendly navigation, and content management features.

NexGen Education Platform nexgen-ed.com

Web Developer

Scalable Architecture | UI/UX

- Designed and deployed a modern educational platform implementing scalable web architecture.
- Ensured responsive UI for seamless experience across multiple devices.

CompYouters Educational Platform compyouters.org

Web Developer

Computer Science Education | Interactive Elements

- Built a comprehensive educational platform covering computer hardware and science.
- Developed structured content pages and interactive elements for learners.

ENGINEERING & SECURITY RESEARCH

- **Cyber Security:** Built a custom **AV-evasive reverse-shell loader** achieving a Meterpreter shell, demonstrating advanced system security knowledge.
- **Machine Learning:** Developed **CNN models** for object classification (diseased cells) and statistical image analysis.
- **Compiler Design:** Built "**Project K Lang**", a GCSE-style pseudocode transpiler written in **C++**.
- **Robotics:** Engineered a custom **Arduino drone** using MultiWii and a **5kg battle bot** with a snail-cam flipper mechanism.

PROFESSIONAL EXPERIENCE

Mobile Application Developer

11/2024 - Present

Self-Employed

- Collaborating with clients to architect and deploy native and cross-platform mobile applications.
- Designing intuitive **UI/UX interfaces** that increased user engagement metrics.

Full Stack Web Developer

01/2022 - Present

Self-Employed

- Developing high-performance interactive web pages using **JavaScript, HTML, and CSS**.
- Integrating **RESTful APIs** to ensure seamless data synchronization between frontend and backend systems.

Automation Consultant

05/2020 - 11/2022

Freelance (Fiverr / Upwork)

- Spearheaded **automation projects** that reduced client manual processing time significantly.
- Delivered custom software solutions tailored to specific business inefficiencies.

EDUCATION

Asia Pacific University, Malaysia

2025 - Present

B.Sc (Honours) in Computer Science (Cyber Security)

Nixor College, Pakistan

2023 - 2025

A-Levels: Science
